

A website for connecting Japanese SMEs with outstanding Monozukuri(Manufacturing) technologies with overseas businesses.

J-GoodTech

J-GoodTech is a new website that showcases great numbers of outstanding Japanese Monozukuri craftsmanship SMEs, including “top niche” companies that are highly competitive in respective fields, as well as “unique” companies with technologies inimitable by competitors. These companies are carefully selected to be on the J-GoodTech website for businesses from around the world. J-GoodTech is operated by the Organization for Small & Medium Enterprises and Regional Innovation, JAPAN (SME Support, Japan), government organization.

What is J-GoodTech for

1. **Select and present SMEs with outstanding Monozukuri (manufacturing) technologies and products on its site.**
2. **Provide information to the world and facilitate matching between Japanese SMEs and overseas businesses.**
3. **Connect Japanese SMEs with Open Innovation worldwide.**

Company Profile Samples

Takasago Electric, Inc.

One of Japan's largest providers of valves for analyzers.

- Our valves and pumps necessary for analyzers are used in the most advanced fields such as the extra-compact, extra-light pump for experimental equipment in the International Space Station and the small valve for the exploration vessel sent down 3,000m underwater.

Polysis Co., Ltd.

An original polyurethane resin product adopted for the Shinkansen bullet train!

- We have developed a polyurethane gel having stretch elongation rate over 700%.
- The gel has excellent vibration absorption ability, doubling that of rubber.
- Its range of use is expanding further such as human skin for dummies and others.

Nagase Integrex Co., Ltd.

A leading manufacturer of large and medium-sized precision formed grinding machines!

- Our machines are the first in the world to put cuts as small as 1 μm to a work piece.
- This product has been adopted for mirror processing on the high-resolution multi-wavelength telescope system and many other such processing.
